HBNnaturals
PRODUCT INFORMATION PAGE

ingredients

Pelargonium graveolens (Geranium, rose), Commiphora myrrha (Myrrh), Aniba rosaeodora (Rosewood), Lavandula angustifolia (Lavender, fine), Mentha piperita (Peppermint), Eucalyptus citriodora (Eucalyptus Citriodora), Melaleuca alternifolia (Tea Tree), Sesamum indicum (Sesame Seed), Cannabis sativa (Hemp Seed) Oil

responsible cautions

- Never apply directly to an animal's muzzle area, inside nostrils, inside ears or mouth, or directly to genital areas.
- Do not get Essential Oils near or in the eyes. If Essential Oils accidentally get into the eyes, apply a carrier oil such as Grape Seed to a cloth and wipe over the area.
- Consult with a veterinarian before use if your pet has a serious medical condition or is on prescription medications.
- Avoid during first few weeks of an animal's pregnancy and do not use on puppies until after 10 weeks of age.
- Remember, less is best when it comes to Essential Oils. Do not be tempted to think that if it's good, more is better.

product summary

In many areas, fleas & ticks are a serious problem, and both can transmit diseases that may be a threat not only to your pets, but your human family as well.

Persistent itching from flea bites can drive your animal wild. Constant scratching or chewing to relieve the itch may contribute to hot spots which can then become infected.

Tick bites can transmit Lyme Disease and Rocky Mountain Spotted Fever to both animals and humans. Both of these diseases can be serious, or even fatal, to your and your pet's health.

Commercial flea & tick treatments are toxic pesticides that can compromise the health of your animals. This formula is safe and effective when used as directed.

suggested use

- **Bath:** Add 6-12 drops undiluted oil blend to 1 ounce all natural shampoo and bathe the animal, using caution not get it into the eyes or ears.
- **Misting:** Combine 5-6 drops with 2 ounces of distilled water in a cobalt blue glass or PET plastic bottle. Shake well before use. Mist around the area where your pet sleeps, making sure to allow bedding to dry before they use the bed. Be careful to not spray into animal's eyes or mouth.
- **Repellent Spray:** Spray directly onto the animal and then massage it through the hair. Do not apply so much that your pet wants to lick it off.

not to be used with

Cats: due to their highly sensitive metabolic systems.

Fish and Reptiles: due to their pH levels and aquatic environment.

Birds: due to their respiratory and metabolic systems.

Rodents & small mammals (gerbils, hamsters, rabbits, rats, etc.): there is not enough research on the use of Essential Oils with these animals to determine a safe use.
